SUMMARY

Product Designer with 4+ years of UI/UX experience across FMCG, consumer platforms, and enterprise digital systems. Skilled in building modular, atomic-level UI components, multi-brand product adaptation, user research, and AI-assisted design workflows. Holds a Master's in Technology Management with a focus on Design Innovation.

WORK EXPERIENCE

Deptech Digital Indonesia — Jakarta

Jun 2023 – Present

IT consulting services specializing in websites, web portals, management information systems, and digital applications. Platforms: websites, PWAs, mobile apps, POS systems, admin portals, analytical dashboards, claims management systems. Payment integration: Xendit, Midtrans, OY! Indonesia, JomPay, crypto transactions.

- Delivered 26+ digital products (~10 projects annually) across insurance, FMCG, finance, government, healthcare, and crypto sectors including 17+ live white-label insurance portals for enterprise B2B partnerships, spanning websites, PWAs, mobile apps, POS systems, admin portals, and analytical dashboards

Product Designer, Enterprise Multi-Brand Platforms

Jun 2024 – Present

- Serve as dedicated designer for a multi-brand enterprise platform, managing 20+ concurrent white-label projects for partners including ride-hailing platforms (3 systems), regional partners (8+ portals), fintech integrations, and internal operations tools
- Collaborated with cross-functional teams of 5–18+ members (developers, QA, PMs, business and data analysts) serving Indonesian and Malaysian markets, managing concurrent project timelines and stakeholder expectations
- Built modular, atomic-level UI component sets (buttons, icons, color & typography tokens, filters) for each white-label build, replicating and adapting the pattern across 17+ enterprise products results in keeping visual consistency high (~90%) while containing the impact of scope or brand changes within each file
- Integrated external design systems (eWallet platforms) with core products across multiple implementations, reconciling brand and technical constraints across merged digital experiences for Indonesian and Malaysian markets
- Designed multi-stakeholder solutions spanning customer-facing portals (eWallet integration, purchase flows), internal operations systems (claims/case management for field and staff users), and gamification platforms, demonstrating versatility across B2C, B2B, and internal user contexts
- Achieved consistent 1–2 presentation approval cycles by delivering high-fidelity, client-ready prototypes validated through data-driven user testing before stakeholder review, reducing iteration time and accelerating time-to-market

UI/UX Designer

Jun 2023 – Jun 2024

- Served as sole designer on lean cross-functional teams of 4–7 members (PM, QA, and mobile/front-end/back-end developers), delivering end-to-end UI/UX for healthcare, monitoring system, and POS system products
- Conducted end-to-end system audits and user testing for enhancement projects, producing data-driven mockups and design rationale to identify UX flow improvements and validate solutions through iterative testing
- Analyzed business models and user experience patterns to inform front-end design decisions, ensuring technical feasibility and business value alignment across diverse enterprise requirements

Freelance UI/UX Designer — Remote

May 2023 – Present

- Collaborate with clients across legal, healthcare, travel, and e-commerce sectors, delivering responsive websites and mobile apps designed against MVP requirements and validated through UAT and user testing
- Pioneered an AI-assisted design workflow integrating Claude/Gemini for research, Figma Make for generation, and Antigravity for HTML prototyping, enabling code-free deployment to production staging
- Developed end-to-end solutions including a legal consulting platform (lawyer selection, order management, timed chat), a therapy center ERP (staff/student management, scheduling), and e-commerce checkout optimization
- Built landing pages, dashboards, and directory platforms with advanced filtering and user-driven search functionality

Reka Cipta Digital — Jakarta

Aug 2021 – May 2023

Software house specializing in website and application development. Tools: Figma, no-code software, Infinity, Taskade, Adobe Suite, WordPress, Google Suite.

- Led daily meetings with design and engineering teams to align on project goals and development timelines

- Conducted user research using design thinking processes and qualitative methods to create user flows, personas, and UX strategy
- Produced UX design solutions through wireframes, visual designs, flow diagrams, and interactive prototypes, with design rationale documentation for front-end implementation
- Tested UI elements including CTAs, banners, page layouts, and flows for landing pages to optimize conversion
- Collaborated on handoff with the development team, discussing future development, bug fixing, and implementation strategy
- Mastered Figma responsive design techniques including auto-layout, variants, and component-based design

Badan Amil Zakat Nasional (BAZNAS) — Jakarta

Apr 2020 – Dec 2021

National philanthropic organization managing zakat, infaq, and alms (ZIS) at the national level.

- Led a design team of 3 to deliver 20+ design requests weekly, including digital campaigns and print materials
- Coordinated with BAZNAS branches nationwide to ensure consistent design communication across all marketing channels
- Produced marketing assets for social media, digital ads, brochures, infographics, and event visuals based on location surveys
- Reviewed and refined final outputs to align with branding standards and communication goals
- Trained and onboarded new team members, delegating tasks and ensuring project timelines were met

EDUCATION

Institut Teknologi Sepuluh Nopember — Surabaya (Online)

Feb 2025 – Jul 2026

Master of Technology Management, Design Innovation Management, GPA 3.89/4.00

Thesis: “Design Rationale Documentation and Traceability Framework for Solo Designers in Multi-Brand Products: A Case Study at PT Friendsure Technology”

Relevant coursework: Design Thinking, Design Management, Strategic Brand Management, UX Design, Project Management, Business Statistics

Universitas Multimedia Nusantara — Gading Serpong

Aug 2017 – Jan 2021

Bachelor of Interactive Design, GPA 3.55/4.00

Final project: Interactive card game for children with dyslexia (researched, designed, and prototyped). Focus areas: HCI, interactivity, interface design, and design methods.

SKILLS, CERTIFICATIONS & OTHER

Design Tools: Figma, Framer, Adobe Illustrator, Adobe Photoshop, Adobe Premiere, After Effects, Canva, CapCut

UX & Prototyping: Wireframing, mockups, user flows, journey mapping, design thinking, user/usability testing, prototyping, MVP & UAT, design rationale documentation

Design Approach: Data-driven design, UX optimization, business model analysis, front-end collaboration, multi-brand component systems

Research & Analysis: User research, system analysis, design strategy, Excel, Tableau, LINGO

Certifications: Adobe Certified Associate (Illustrator) · UI/UX Bootcamp, Purwadhika (2021) · IDF User Experience Foundation (2023) · Full Stack Integration, Skill Academy (2024)

Languages: Indonesian (Native) · English (TOEFL 550, British Council 570) · Korean (Beginner)
