Jakarta, Indonesia

Product Designer with 4+ years building user-centered digital products across fintech, insurance, e-commerce, and healthcare. Proven track record shipping 20+ features through user research, design systems, and cross-functional collaboration. Specialized in multi-brand architecture and AI-assisted rapid prototyping.

Work Experiences

Deptech Digital Indonesia - Jakarta

Jun 2023 - Present

Product Designer

Led product design for insurance technology platform (since June 2024) and cross-sector digital products as solo designer, balancing user impact with technical feasibility across 3-4 concurrent projects. Product Portfolio: Progressive Web Apps, mobile apps (iOS/Android), responsive platforms, admin dashboards, POS systems | Technical Integration: Payment APIs (Xendit, Midtrans, OY!, JomPay), insurance systems, health devices

- Delivered 26+ digital products (~10 projects annually), including 17+ live white-label insurance portals for enterprise B2B partnerships and 6 cross-sector projects spanning FMCG, finance, government, healthcare, and crypto
- Built multi-brand design system from scratch serving 16 active implementations, reducing brand adaptation through systematic component architecture while working within Figma Free constraints, enabling consistent user experience and rapid partner onboarding
- Designed national-scale election monitoring PWA for 2,000+ users across 38 provinces processing 820,000+ polling stations during critical 48-hour window, optimizing data-entry workflows for non-technical field operators and achieving 90% immediate adoption
- Led insurance purchase flow design integrated with leading Malaysian eWallet (20M+ users), partnering with cross-border engineering teams (daily sync) on API integration to ensure seamless user experience and technical feasibility across merged platforms
- Redesigned FMCG loyalty platform for global nutrition brand serving 30+ field representatives, identifying critical password reset flow gap and designing digital UI integrated with physical health-measurement hardware for streamlined nationwide event data collection
- Enabled rapid partner acquisition through design-first approach, delivering landing pages in 2-3 hours and complex portals in 2-5 days with high-fidelity prototypes using real user data, serving as key competitive differentiator
- Collaborated in user research and usability testing to validate design solutions, maintaining 1-3 developer discussion rounds through detailed technical documentation and close engineering partnerships
- Collaborated with cross-functional teams of 5-18+ members (13+ developers, 3 QAs, PMs, business analysts, data analysts) serving Indonesian and Malaysian markets, managing concurrent project timelines and stakeholder expectations

Freelance UI/UX Designer - Remote anywhere

May 2023 - Present

Partnered with startups and SMBs to design and ship digital products from concept to launch across healthcare, legal, and e-commerce sectors.

- Reduced project delivery by 70% (from 1-2 weeks to 2-3 days) through AI-assisted workflow integrating Claude/Gemini for research synthesis and Figma Make/Antigravity for rapid prototyping, creating 3 fully functional portals as live interactive prototypes for faster validation
- Designed legal consulting marketplace with lawyer discovery, order management, and real-time chat, optimizing user journey through user interviews while collaborating with engineers on technical implementation
- Built therapy center management system with staff/student tracking and scheduling, reducing administrative overhead through workflow optimization and user-centered design

- Created interactive multi- screen system for LED displays and mobile sync in 2 days, demonstrating rapid adaptation to non-traditional interface design challenges
- Optimized e- commerce checkout experiences through iterative testing and conversion funnel analysis, streamlining purchase completion flows

Reka Cipta Digital - Jakarta

Aug 2021 - May 2023

UI/UX Designer

Software house specializing in website and application development. Tools: Figma, No-Code Software, Infinity, Taskade, Adobe Suites, WordPress, Google Suites.

- Led daily standups with product and engineering teams, conducting user research to inform strategy and creating wireframes, user flows, and interactive prototypes through iterative process
- Designed and A/ B tested landing page variations to optimize conversion rates and user engagement, collaborating with engineers on technical implementation
- Produced UX design solutions and mockups through wireframes, visual designs, flow diagrams, and interactive prototypes, with design rationale documentation for front-end implementation
- Built responsive design systems in Figma using auto- layout, variants, and components, improving design consistency and development handoff efficiency

Badan Amil Zakat Nasional (BAZNAS) - Jakarta

Apr 2020 - Dec 2021

Graphic Designer

National philanthropic organization managing zakat, infaq, and alms (ZIS) at the national level.

- Led team of 3 designers delivering 20+ design requests weekly for national organization
- Coordinated with nationwide branches to maintain brand consistency across channels
- Trained and onboarded new team members, establishing workflows and quality standards

Education Level

Institut Teknologi Sepuluh Nopember - Surabaya (Online learning)

Feb 2025 - Jul 2026 (Expected)

Master of Technology Management, Design Innovation Management, 3.85/4.00

- Master's Thesis (In Progress): Developing design documentation framework for solo designers managing multi-brand products, focusing on design decision tracking and knowledge transfer.
- Relevant Coursework: Design Thinking, Design Management, Strategic Brand Management, UX Design, Project Management, Business Statistics

Universitas Multimedia Nusantara - Gading Serpong

Aug 2017 - Jan 2021

Bachelor of Interactive Design, 3.55/4.00

- Final project: Interactive card game for children with dyslexia (researched, designed, and prototyped). Learned HCI, interactivity, interface design, and design methods.

Skills, Achievements & Other Experience

- **Design Tools** : Figma, Framer, Adobe Illustrator, Adobe Photoshop, Adobe Premiere, After Effect, Canva, Capcut.
- **UX & Prototyping** : Wireframing, Mockups, User Flows, Journey Mapping, Design Thinking, User Testing, Usability Testing, Prototyping, MVP & UAT, Design Rationale Documentation
- **Design Approach**: Data-driven Design, User Experience Optimization, Business Model Analysis, Front-end Collaboration, Design Systems
- **Research & Analysis**: User Research, System Analysis, Design Strategy, Excel, Tableau, LINGO
- **Certifications and Courses** : Adobe Certified Associate (Illustrator) | UI/UX Bootcamp (Purwadhika, 2021) | IDF User Experience Foundation (2023) | Full Stack Integration (Skill Academy, 2024)
- **Language**: Indonesian (Native) | English (TOEFL 550, British Council 570) | Korean (Beginner)
